Urban Development and Sustainability
 – a Mayor Challenge for Waste
 Management in the 21st Century

ISWA International Solid Waste Association

The International Solid Waste Association, ISWA, is the international association of waste industry. There are 37 national members and around 1000 private or organisational members from science, administration and the waste industry.

The aim of ISWA is to develop international sustainable waste management. Within the yearly events of the international waste industry, the ISWA World Congress 2010 in Hamburg is the culminating point of ISWA's activities.

Be there and:

- Participate in an international forum.
- Share experiences with outstanding experts.
- Find out all about technical innovations in handling and treatment of waste.
- Take part in Research and Practice of waste management.
- Hear about related aspects to urban development.
- See the impact of waste on a sustainable development in the cities.

Urban Development and Sustainability – a Mayor Challenge for Waste Management in the 21st Century

Programme Highlights

15.11.2010

Opening Ceremony

The EU approach to Sustainable Development

Sustainable development in Austria

Sustainable development in Germany

Sustainable development in Hamburg

Sustainability and resource-efficiency

Sustainability and climate efficiency

The impact of the financial crisis on the waste sector

Energy the mayor challenge to sustainability in the 21st century

16.11.2010

The Role of Thermal Treatment of Waste in the 21st Century

How to optimize existing plants?

Exhaust gaz cleaning – new challenges?

The role of WtE for the supply of energy

RDF – new aspects?

Technology for urban collection and recovery of waste materials

Noise reduction and waste management in cities

Urban planning consideration of requirements for a sustainable waste management in rban development

How to clean our cities?

German session:

Jahresfachtagung der Landesgruppe Küstenländer des VKS im VKU

17.11.2010

Joint Combustion vs. Separate use of Different Fractions

Organic waste collection and treatment

New concepts and innovations in the waste sector

The future lab for waste management

Big scale recycling – offshore installations, aircrafts, railroad equipment etc.

Waste management and the role of the public sector

German session:

Jahresfachtagung der Landesgruppe Küstenländer des VKS im VKU – Fortsetzung

Closing Ceremony

GALA Dinner

18.11.2010

Urban Development and Sustainability
– a Mayor Challenge for Waste
Management in the 21st Century

ISWA International Solid Waste Association

Die International Solid Waste Association (ISWA) ist der internationale Verband der Abfallwirtschaft. Ihm gehören 37 nationale Mitglieder und rund 1.000 persönliche oder organisatorische Mitglieder aus Wissenschaft, Verwaltung und Entsorgungswirtschaft an.

Die Ziele der ISWA sind die Förderung eines internationalen nachhaltigen Abfallmanagements. Der ISWA World Congress 2010 in Hamburg ist für die internationale Abfallwirtschaft Höhepunkt der ISWA Aktivitäten.

- Nehmen Sie an internationalen Foren teil.
- Tauschen Sie Erfahrungen mit internationalen Experten aus.
- Informieren Sie sich über technische Innovationen in der Behandlung und Verarbeitung von Abfall.
- Erfahren Sie mehr über die Praxis des Abfallmanagements.
- Informieren Sie sich über die Zusammenhänge von urbaner Entwicklung.
- Betrachten Sie den Einfluss von Abfallmanagement auf die nachhaltige Entwicklung der Städte.
