Recycling of waste
electrical and electronic
equipment in Ghana

Project examines innovative recycling technologies for WEEE

Research Project and Matchmaking Event

How can the practice of WEEE recycling in Ghana be improved?

This question is being addressed by a research project led by Fraunhofer UMSICHT and funded by the German Federal Ministry for the Environment. The aim of the project is to examine how the existing treatment can be supplemented by innovative thermochemical processes and optimised distribution channels.

A matchmaking event aims to connect Ghanaian recyclers with German technology providers to explore ways of improving local recycling through technology transfer from Germany.

German-Ghana matchmaking event

When? November 21, 2023

Where? Online via MS-Teams

- Why?
- Gain insights into WEEE-recycling in Ghana
 - Connect with Ghanaian stakeholders
 - Present your Companies technology solutions
 - Explore collaborations and business opportunities
